Glyphosate

aka "Round-Up"

Your Health Depends on It!

Glyphosate is a military grade organophosphate chemical poison that is used in our non-organic food supply as a weed spray and entire crop treatment for non-organic food. Glyphosate affects the human body, our soils, and animals equally. To avoid glyphosate exposure, it is important to eat primarily organic.

Non-Organic Foods Commonly Sprayed with Glyphosate in Agriculture:

Grains (Wheat, Oats, Rye, Barley, Rice), Sweet Potatoes, Potatoes, Legumes (Beans, Peas, Lentils, Soy), Sunflower Seeds (and oil), Cottonseed (Cotton and oil), Fruit Orchards (especially citrus, grapes), and the foods with those ingredients like oils, alcohol (wine, beer, liquor). These are a listing of crops directly sprayed with glyphosate and does not include pre-treatment of soils prior to planting. GMO Foods can also contain Glyphosate or gut altering properties (ex. Soy, Corn, Canola, Cottonseed, sugar beets (non-cane sugar), Animal Feed, Alfalfa, Aspartame, & Honey near crops).

Chemical Properties of Glyphosate designed to kill organisms.

- **Chelator**- binds and removes all valuable **minerals** from the soil, our food, our bodies and creates nutrient deficiencies.
- **Antibiotic**- removes soil microorganisms that produce nutrients in healthy organic soil ecosystems, alters human/animal gut bacteria/Microbiome.
- **Carcinogen** of all cancers and lymphoma
- **Endocrine/Hormone Disruptor**: Think thyroid, sex hormones, fertility, adrenal, and more
- **Detoxification** pathways are reduced linked to our gut bacteria.
- **Cellular Communication** is disrupted, which is root of all disease.
- **Oxidative Stress** in the body
- **Cellular binding/matrix** is disrupted, especially in the tight junctions of the gastrointestinal tract.
- **Amino Acid** produced by gut bacteria are reduced for neurotransmitters and cellular matrix.

Indirect Causes of Disease

- Gut Dysfunction: leaky gut (increased gut permeability), food allergens, celiac disease, gluten intolerance, environmental allergens, irritable bowel (UC, Crohn's, IBS), obesity.
- Auto-Immunity is highly linked to leaky gut and glyphosate.
- Reduces mitochondrial energy and cells and the nervous system & overall body fatigue & brain fatigue.
- Muscle/Skeletal Pain and Inflammation
- Neurological Dysfunction & Reduction in Neurotransmitters: Brain Fog, Reduced memory & concentration, Alzheimer's, Parkinson's, Depression, Anxiety.
- Reduces Serotonin, Dopamine, Melatonin production in which 90% occurs with gut bacteria, which is also linked to Low Melatonin. These are linked to anxiety, depression, and insomnia.
- Autism is linked to glyphosate exposure and can have considerable improvement with gut work.
- Nutritional deficiencies: cancer, diabetes, obesity, and cellular dysfunction.

What to Do?

Eat Primarily Organic, Grow your own food

Move if you live near a farm that uses glyphosate or an area with it in the rainwater, air, groundwater, grain farms, etc.

Ion Gut Biome removes **glyphosate from the gut** for a 1 month cleanse, reboot, as needed or lifetime use.

Purium Biome Medic also removes glyphosate from the gut. Discount Code KimFedderly at <https://ishoppurium.com/?giftcard=KimFedderly>

Ion Gut/Biome® is a product designed to reverse the destructive effects of glyphosate in the body thru restoring gastrointestinal permeability (leaky gut), Microbiome (gut bacteria), and cellular communication. Restore® is derived from ancient soil layers of trace minerals/lignites that remineralize our body even if ingested with glyphosate. Restore was designed to work against the effects of glyphosate, reverse leaky gut, and reverse effects of Autism by healing the gut. You can purchase with a 10% discount at <https://us.fullscript.com/welcome/kfedderly/signup> (code kfedderly)
