RESTORE YOUR HEALTH AND BEAUTY

Amethyst healing is an art and practice, done on a metaphysical level that has been rediscovered because of the power of the Earth's energies that have been absorbed by these sacred objects. In turn, they inherit vital healing powers for many types of ailments.

Some believe that amethyst has physical, spiritual, calming and zodiacal powers that can be used for medical treatment of everything from pain, stress, and depression, to the feelings in the Mind, Body and Spirit.

Amethyst has come to be known as a power crystal with prolific healing powers that can be characterized as purifying, pacifying and transitional. Amethyst has the ability to transform lower energies into higher ones, and acts as a healer on all levels of Mind, Body and Spirit. The healing powers of Amethyst date back as far as the ancient Greeks who believed that Amethyst protected a person from the intoxicating effects of alcohol. The word "Amethyst" is of Greek origin, and is translated as - "Amethystus" intoxicated ("methystos" from "methyein" or intoxicated, "methy" = wine).

NATURAL INFRARED RAYS

There are many physical ailments for which the healing power of Amethyst is used as a remedy. As an elixir, Amethyst can be used to treat toothaches, skeletal discomforts, posture, and other bone and joint-related sicknesses (like arthritis). Amethyst also cures problems within the stomach, digestive tract, the heart and hearing. It has been known to treat various types of blood disease and helps to balance blood sugar. Amethyst, as a healing stone or crystal, is used to treat and heal problems involving the central nervous system. Amethyst is a treatment for both convulsions and neuralgia.

The Safest Energy Source!

This Wonderful Feeling is a Dream Come True!

Known for its power to detoxify the body from alcohol and other harmful elements, Amethyst also produces Far Infrared Rays. These rays revitalize the biological function of your cells to: increase blood circulation, promote perspiration, relieve neuralgia, backaches and arthritis, and eliminate toxins. The Far Infrared Rays are good for relaxation, act as an antibacterial agent, and purify the air.

NATURAL INFRARED RAYS ARE THE SAFEST ENERGY SOURCE

Amethyst is universally accepted as the healing crystal, and has been since ancient times.

There are a number of ways to incorporate it into a healing practice. Amethyst is identified as a crystal that functions favorably in clearing certain types of blockage, and in aligning the Chakras. By transforming energies on all levels, Amethyst also has the ability to balance and stabilize energies located within certain areas.

Amethyst is found to heal and align ailments. The benefit of using a crystal lies in the healer being able to "detach" him or herself from the healing process. The healer assigns the healing channel to the crystal, which frees the healer from involvement in the process. The healing process then becomes: universal energy > the Amethyst > the recipient. Notice that the healer and the ego are not part of the process. The healer is able to carry on with a healing session acting solely as the channel. The ego has less opportunity to take the credit for itself, because the healing channel has been assigned to the Amethyst by the healer.

GOOD SLEEP

Amethyst, as a healing stone, contains sobering and calming qualities. This stone is commonly associated with peace. Amethyst is known to calm and protect the mind. It soothes those who have engaged in constant rigorous mental activity. It has been deemed "nature's tranquilizer" by many healers because of its effectiveness in relaxing not only the mind, but also the nervous system. Besides being a stone of tranquility and repose, Amethyst is also known to enhance mental strength, stability, and vigor. It is also effective in protecting the mind from psychic attacks and transforming negative energy into that of positive and tranquil tenacity.

TOURMALINE

Tourmalines are abundant, complex boron and aluminum silicate minerals of variable composition. Tourmaline comes in a wide range of colors, depending on its mineral composition, with black being the most common. Colors vary from clear, pink, rosy red, yellow, honey, green, blue, violet, brown and black. Some crystals are pink at one end and green on the other. Concentric color zoning often occurs as well. The colored varieties, when transparent and flawless, are cut as gems. In addition to its use as a gem, tourmaline is employed in pressure devices because of its piezoelectric properties.

Chemistry	Crystal System	Hardness
SiO ₂ + B, Al	Hexagonal	7.0 – 7.5
Cleavage	Fracture	Specific Gravity
None	Variable	3.0 – 3.2

Tourmaline forms slender 3, 6, or 9-sided prismatic crystals(hexagonal system) in parallel or radiation groups, which causes it to develop an electrical charge when heated or deformed. Pieces cut perpendicular to the long axis can polarize light, and a pair of these plates form a very simple polarizing apparatus known as tourmaline tongs.
